

**TO: ALL CUSTOMERS & PRESS**

**SUBJECT: PRODUCT SUPPLY STATUS: EARTHQUAKE & TSUNAMI IN JAPAN**

Isuzu Production & Scheduling; Status

Isuzu will resume production for industrial engines on 5 April.

Production will be limited and subject to the supply of components, especially from Tier 3 and Tier 4 suppliers. The manufacturing operation will produce at volumes far below capacity for the following few weeks. Production schedules will be fixed weekly during this period.

We expect to begin reporting via daily updates to our customer base this week, and will continue to update as needed and until full manufacturing capacity is reached.
